

# Summary of the progress

## *Working Group 1: Mushrooms and truffles*

Krakow, 20<sup>th</sup> - 21<sup>st</sup> of February 2014

The WG1 focused their common works in sharing information between the country representatives, seeking research synergies and strengthen the mutual knowledge between the WG1 members. Individual presentation concerning the situation of mushrooms and truffles per country in the Krakow's meeting allowed the group identify research gaps, envisaging future cooperative works. The main outcome of this process will be (still in process) a list of opportunities for mutual cooperation.

### **Next steps**

The WG1 will design a common questionnaire based on the identified gaps of knowledge about mushrooms & truffles in the involved European countries. The questionnaire will serve as a basis for filling the future data-base and for preparing common publications.

Dr Jose-Antonio Bonet

WG1 Coordinator
